Goal: Make Claro the new default Admin theme

- Display the vertical scrollbar with many results...
- Tables overflow on mobile
- Move hard coded vertical tabs classes to a theme function...
- Dropbutton is broken on small screen with multiple lines...

- Redesign Installer
- Redesign Settings Tray

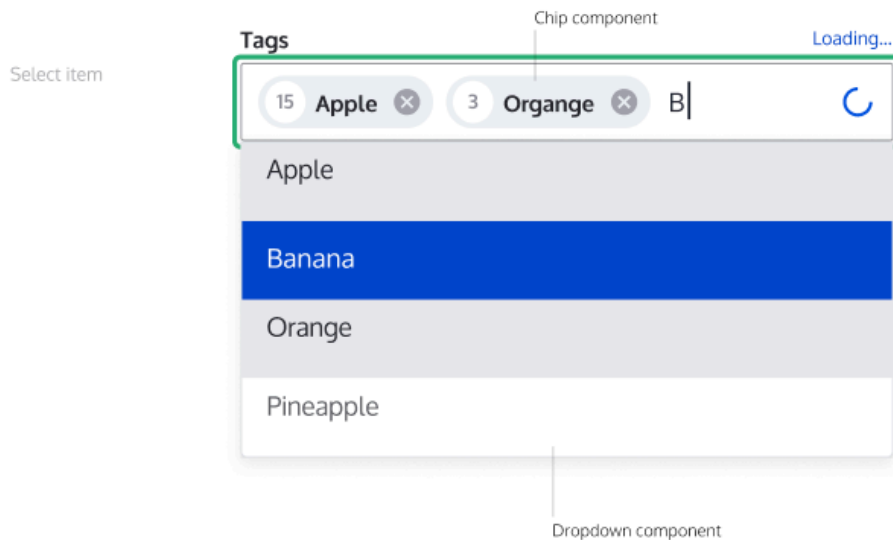

Admin UI

Where should we go

Improve designs.

Version 2 - with Chips

More examples for the Chip component.

Layout changes

Improve legibility

PHASE 1

Create Basic page ☆

Vestibulum id ligula porta felis euismod semper. Nullam quis risus eget urna mollis ornare vel eu leo. Maecenas sed diam eget risus varius blandit sit amet non magna. Etiam porta sem malesuada magna mollis euismod. Integer posuere erat a ante venenatis dapibus posuere velit aliquet. Sed posuere consectetur est at lobortis.

Vivamus sagittis lacus vel augue laoreet rutrum faucibus dolor auctor. Duis mollis, est non commodo luctus, nisi erat porttitor ligula, eget lacinia odio sem nec elit. Cum sociis natoque penatibus et magnis dis parturient montes, nascetur ridiculus mus. Donec id elit non mi porta gravida at eget metus. Duis mollis, est non commodo luctus, nisi erat porttitor ligula, eget lacinia odio sem nec elit.

Paragraphs

One column

Text

The Alpine region of Switzerland, conventionally referred to as the **Swiss Alps** (German: **Schweizer Alpen**, French: **Alpes suisses**, Italian: **Alpi svizzere**, Romansh: **Alps svizras**), represents a major natural feature of the country and is, along with the **Swiss Plateau** and the **Swiss portion of the Jura Mountains**, one of its **three main physiographic regions**. The **Swiss Alps** extend over both the **Western Alps** and the **Eastern Alps**, encompassing an area sometimes called **Central Alps**.^[1] While the northern ranges from the **Bernese Alps** to the **Appenzell Alps** are entirely in Switzerland, the southern ranges from the **Mont Blanc massif** to the **Bernina massif** are shared with other countries such as **France**, **Italy**, **Austria** and **Liechtenstein**.

Two column

Text

The **Swiss Alps** comprise almost all the highest mountains of the **Alps**, such as **Dufourspitze** (4,634 m), the **Dom** (4,545 m), the **Liskamm** (4,527 m), the **Weisshorn** (4,506 m) and the **Matterhorn** (4,478 m). The other following major summits can be found in this [list of mountains of Switzerland](#).

Image

Text

The Alps cover 60% of Switzerland's total 41,285 square kilometres (15,940 sq mi) surface area, making it one of the most alpine countries. Despite the fact that Switzerland covers only 14% of the Alps total 192,753 square kilometres (74,422 sq mi) area,^[2]^[3] 48 out of 82 alpine four-thousanders are located in the Swiss Alps and practically all(number(s) needed) of the

Menu settings

[Page structure](#)

Metatags

Configure the meta tags below:

Use tokens to avoid redundant meta data and search engine penalization. For example, a "keyword" value of "example" will be shown on all content using this configuration, whereas using the `{node.field_keyword}` automatically inserts the "keywords" values from the current entity (node, term, etc). [Browse available tokens.](#)

Basic tags

Simple meta tags.

Page title

The text to display in the title bar of a editor's user browser when they view this page. This meta tag may also be used as the title of the page when a robot bookmarks or favories this page, or as the page title in a search engine result. It is common to append `{site-name}` to the end of this, so the site's name is automatically added. It is recommended that the title is no greater than 50 - 60 characters long, including spaces.

Description

A brief and concise summary of the page's content that is a maximum of 160 characters in length. The description meta tag may be used by search engines to display a snippet about the page in search results.

Abstract

A brief and concise summary of the page's content, preferably 160 characters or less. Where as the description meta tag may be used by search engines to display a snippet about the page in search results, the abstract tag may be used to archive a summary about the page. This meta tag is no longer supported by major search engines.

Keywords

A comma-separated list of keywords about the page. This meta tag is no longer supported by most search engines.

Advanced

Meta tags that might not be needed by many sites.

Geographical place name

Sidebar content and behavior

Roles

Role settings

A role defines a group of users that have certain privileges. These privileges are defined on the [Permissions page](#). Here, you can define the names and the display sort order of the roles on your site. It is recommended to order roles from least permissive (for example, Anonymous user) to most permissive (for example, Administrator user). Users who are not logged in have the Anonymous user role. Users who are logged in have the Authenticated user role, plus any other roles granted to their user account.

Final thoughts

Wrapping up

We need Claro as the default admin theme for D10

Maintain only 1 theme!

We need Claro as the default admin theme for D10

We'll have more testers, so the UI will improve.

We need Claro as the default admin theme for D10

We'll be able to focus ours efforts on new improvements:

- **Form to choose Accent color / palette**
- **Dark mode**
- **New role menu**
- **New Layout updates**
- **Inline help/instructions for Site-builders**
- **...and more!**

Help us getting Claro into stable

[#3066007]

Help us getting Claro into stable
